Summary

Full Stack Developer with hands-on experience building healthcare web applications using Angular, Node.js, Express.js, and MongoDB. Strong RESTful API design and backend fundamentals in Java and Spring Boot, with additional experience in test automation (Playwright, WebdriverIO) and performance testing (Artillery), giving full ownership across the development lifecycle.

Education

Jawaharlal Nehru New College of Engineering (V.T.U)

Bachelor of Engineering in Information Science and Engineering, CGPA: 7.5/10

Nov 2020 – Jun 2023

Shimoga, Karnataka

M.E.S.R.N. Shetty Polytechnic

Diploma in Computer Science

Aug 2017 – Sep 2020

Sirsi, Karnataka

Experience

Full Stack Developer

June 2025 – Present

Teslon Technology

Bangalore, India

- Developed and maintained healthcare web applications using **Angular** for dynamic UI rendering and state management, serving hospitals and patients.
- Built **RESTful APIs** with **Node.js**, **Express.js**, and **MongoDB** (Mongoose) to handle patient data, hospital operations, and healthcare workflows.
- Engineered end-to-end test automation suites using **Playwright** and **WebdriverIO**, catching regressions across critical patient-facing flows and improving release confidence.
- Conducted load and performance testing using **Artillery**, identifying API bottlenecks and ensuring system stability under high concurrency.
- Implemented Retrieval-Augmented Generation (**RAG**) pipelines using **Ollama** for localized LLM interactions and integrated speech-to-text capabilities to enhance user accessibility.
- Evaluated and optimized LLM application performance using **Ragas** framework to measure faithfulness, answer relevance, and context precision.
- Used AI-assisted development via **MCP (Model Context Protocol)** server integration to accelerate automation script generation and speed up delivery.

Software Engineer Intern

Aug 2022 – Dec 2022

Ekathva Innovations Pvt Ltd

Bangalore, India

- Built a Student Result Management System using **Java Servlets**, **JSP**, **JDBC**, and **MySQL**, deployed on **AWS**.
- Improved system performance by **30%** through query optimization, enhancing overall user experience.
- Followed Agile practices for smooth iterative development and on-time deployment.

Projects

E-Commerce Microservices Platform | *Java 21, Spring Boot, Kafka, Docker, OCI, JWT*

Live Demo | **GitHub**

- Architected a scalable **10-service microservices ecosystem** utilizing **Java 21**, **Spring Cloud Gateway**, **Netflix Eureka**, and **Apache Kafka** for event-driven asynchronous order processing.
- Secured API entry points with **Stateless JWT Authentication**, granular Role-Based Access Control (**ADMIN/CUSTOMER**), and **Bucket4j Rate Limiting** to mitigate DDoS & API abuse.
- Containerized full stack using **Docker Compose** (13 containers) and deployed live to **Oracle Cloud Infrastructure (OCI)** with automated CI/CD deployment pipelines.

Technical Skills

Languages: Java, JavaScript

Backend: Spring Boot, Node.js, Express.js, Microservices

Frontend: HTML, CSS

Databases: MongoDB, MySQL

Testing & Performance: Playwright (E2E), WebdriverIO, Artillery (Load Testing)

Tools & Technologies: Git, SourceTree, Postman, Swagger, AWS, MCP (AI-assisted coding), Linux/Unix, OOP

Achievements

- DPDZero Data Analyst Hackathon:** Built an analytics dashboard using Python, Pandas, and scikit-learn (GitHub | Live).
- Leucine Hackathon:** Contributed to a smart manufacturing project (GitHub | Live).
- LeetCode:** Solved 500+ problems | **Coding Ninjas:** Solved 200+ problems.
